The screenshot shows the IBM Watson IoT Platform interface. At the top, there are tabs for 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue bar at the top contains the device name 'DISTANCEDETECT', its status 'Disconnected', type 'ULTRASON', and location 'Device'. Below this, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is selected, showing a table of events. The table has columns for 'Event', 'Value', 'Format', and 'Last Received'. There are five rows of data, all showing a distance of 141.21 and the object as 'No'. The interface also includes a pagination bar at the bottom showing '1 of 1 page' and '1-2 of 2 items'.

Data send to the IBM cloud device when the object is far

The screenshot shows an Arduino IDE window with a code editor on the left and a simulation window on the right. The code is for an ESP32 connected to an HC-SR04 ultrasonic sensor. It includes comments for IBM Watson IoT Platform credentials and a callback function for MQTT. The simulation window shows the sensor's output, indicating that no object was found and sending a payload of {"distance":141.21,"object":"No"}.

Data sent to the IBM Cloud Device when the object is near

The screenshot shows the IBM Cloud IoT Platform console. At the top, there are tabs for 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue header bar contains the device name 'DISTANCEDETECT', its status 'Disconnected', the type 'ULTRASON', and the location 'Device'. The date and time 'Oct 20, 2022 9:46 AM' are also displayed. Below the header, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is selected, showing a table of events. The table has four columns: 'Event', 'Value', 'Format', and 'Last Received'. There are five rows of data, all with the event type 'Data' and the value '["distance":79.66,"object":"Near"]'. The format for all events is 'json', and they were all received 'a few seconds ago'. At the bottom of the table, there is a pagination bar showing 'Items per page: 50' and '1-2 of 2 items'.

| Event | Value | Format | Last Received |
|-------|------------------------------------|--------|-------------------|
| Data | ["distance":79.66,"object":"Near"] | json | a few seconds ago |
| Data | ["distance":79.64,"object":"Near"] | json | a few seconds ago |
